At the installation location there has to be an at-grade base plate with a niveau tolerance of max. ±20mm. The base plate has to have a sufficient sturdiness for mounting dowels M12x120 and has to resist a pressure load of min. 30kg/cm².
Because of the manufacturing tolerances , the drilling patterns for the fixing dowels can not be determined in advance, they must be drilled during installation! !

Safety equipments for example: enclosures,barriers, etc., are not included in the offer.
Any equipment needed can be listed by MEBA in a separate offer
